Summary

Backend-leaning product engineer who owns integrations from discovery and data mapping through deployment and production support. Built marketplace data ingestion and rule-based automation for NuPrice, worked across signing identity and API integrations for Proofmark, and builds tenant-aware SaaS and AI connectors through Technomancy IT.

Skills

- TypeScript, Node.js, tRPC and PostgreSQL
- Partner APIs, webhooks, data ingestion and transformation
- OAuth/OIDC, SAML/SCIM and tenant-aware access
- Data quality, audit trails and operational observability
- Docker, CI/CD and production incident troubleshooting

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Turn incomplete client needs into running software, owning the interface, API, data model, delivery, and direct support.
- Build access-controlled AI and SaaS integrations for Slack, Google Workspace, Atlassian, and internal systems. Use authenticated MCP service boundaries, tenant-aware permissions, and observability where appropriate.
- Built full-stack software and supported the development environments used by data-science and ML engineers on a long-term sensor project.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Led NOC escalations and built diagnostic tooling for operators supporting production services. Maintained PHP and JavaScript web services and developed and replaced production billing software.
- Migrated workloads from Hyper-V and VMware ESXi to Docker and Kubernetes. Ran SOC 1 and SOC 2 audits and translated operational controls into evidence and procedures.

Systems / Software Engineer

Office Evolution

2014 - 2015

• Connected CRM, onboarding, and provisioning across roles. Built Linux-based network provisioning and a front-desk tool to reset Wi-Fi passwords and handle routine troubleshooting.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

• Supported managed-service clients, diagnosed endpoint and network issues, and built diagnostic tooling for recurring incidents.

Infrastructure and Systems Focal

IBM

2010 - 2012

• Automated backup, audit, and compliance workflows. Wrote Perl, Bash, VBA and PHP scripts and built an internal backup tool adopted by executives and other staff.

Selected Projects

NuPrice: Marketplace data and repricing integrations

NuPrice · long-term client engagement

2019 - 2021

• Built and operated the full marketplace repricing product; ingested marketplace and competitor data, and ran pricing decisions against user-defined rules.

• Owned monitoring, subscription billing, analytics, and integrated customer support alongside ongoing technical operations.

Proofmark: Document and identity integration workflows

Proofmark · client engineering

• Designed document lifecycle flows across React, tRPC, and PostgreSQL, from signer identity and routing through audit history and verification.

• Designed explicit verification and fallback paths; the workflow included webhooks and embedded signing.

Education

Front Range Community College

Computer Science coursework

2011 - 2013

Certifications and Training

CompTIA Network+ | CompTIA | Earned
